

Practice Name _____

City _____

This is a Consecutive Patient Log. Use one line for **every** eligible patient (13 years old or older) having a repair or replacement restoration(s), even if a patient does not participate in the study. In column one record **all** restorations (up to 4 per patient) that you repair or replace today on permanent teeth and on whom the patient is 13 years old or older. Use **one line per patient**. In column two, 'Cumulative count of restorations included in the study', stop when you have data recorded for **50** repaired or replaced restorations. If data were not collected on an eligible patient, please check column three or four, 'Time did not allow' or the 'Patient did not want to participate'.

| Number of eligible restorations being repaired or replaced on this patient today (up to 4 per patient) | Cumulative count of restorations included in the study (1,2,3,.....50) | Restorations <u>NOT</u> included (√) | |
|--|--|--|-------------------------------------|
| | | Time did not allow | Patient did not want to participate |
| 4 | 1,2,3,4 | | |
| 1 | - | (√) | |
| 2 | - | | (√) |
| 2 | 5,6 | | |
