QuickPoll

Integrated Diabetic Care Models

One in four Americans has diabetes and about 90% of an estimated 86 million individuals with pre-diabetes are unaware of their diabetic status. Periodontal disease impacts nearly 40% of US adults. Bi-directional exacerbation between the diseases has been demonstrated. Dental professionals are ideally positioned to identify at-risk patients and provide education and referral to medical providers.

Please complete this [5 question poll](#) on diabetes testing in the dental office.
