QuickPoll

[Smiles for Sobriety](#)

The oral health of an individual in court-ordered drug rehabilitation treatment is currently limited to emergency dental care. No research study has examined how receiving comprehensive dental care during drug rehabilitation treatment can affect rate of relapse and quality of life post-discharge. This potential study will provide integrated comprehensive dental care to patients undergoing court-ordered drug rehabilitation treatment and monitor their health and sobriety following dental treatment.

Please take a few moments to complete this [5-question quick poll](#) to help us determine if this would be a possible future study in the Network.
