Network Studies In Progress

Network studies are moving along. If you are interested in participating, learning more about current and upcoming studies, and requirements for participation, contact NationalDPBRN@uab.edu.

Studies currently underway:

Quick Poll-Network Participation

There's still time to participate in our quick poll on [Network Participation](#)

The purpose of this [poll](#) is to learn more about your involvement in the National Dental PBRN and how your experiences may impact your dental practice.

Quick Poll Results-Caries Classification System

in our June 2015 Quick Poll, almost 60% of respondents answered that, although they were not aware of the ADA Caries Classification System (CCS) before the poll was administered, they were interested in an online/web-based resource providing education and training.

Differential diagnoses for persistent pain after root canal treatment: a study in the National Dental Practice-based Research Network

The April 2015 issue of *Journal of Endodontics* featured an article entitled "Differential diagnoses for persistent pain after root canal treatment: a study in the National Dental Practice-Based Research Network".

Clinical Question: Pain present 6 months after root canal treatment (RCT) may be of odontogenic or nonodontogenic origin. What are the specific diagnoses of patients reporting pain 6 months after receiving initial orthograde RCT?
