

# Restoring Implants?

## Participate in the Dental Implant Restoration Registry

The study's goal is to determine the implant therapies associated with the greatest amount of success and the least amount of complications.

### Study Overview

- A 3-year prospective cohort study for dentists who restore implants
- Goal of 2,000 dental implant prosthetics enrolled nationwide

### You are invited to join the study if:

- You place restorations (single, multiple, bridges, partial or complete dentures or overdentures) on implants

### You will:

- Enroll approximately 10-15 patients and a maximum of 50 restored implants
- Collect data electronically and upload digital radiographs

**Compensation provided for participating dentists and patients**
